

Alvaro Falcon Morales

Software Developer

EXPERIENCE

Product Engineer

Sigma Financial AI

2023 - Present

Joined as one of the initial developers, contributing to the continuous growth and refinement of the project.

- Developed new functionalities based on requirements and resolved bugs impacting product performance.
- Engaged in backend tasks for implementing new features and addressing issues.
- Implemented unit testing with Jest and React-testing-tools to enhance code coverage.
- Ensured high quality UI/UX design, focusing on precision and responsiveness.
- Created multiple storybook stories for new and old components.

Android Developer

Triller

2022 - December 2022

In my time working for Triller I have been:

- Developing new features and improving already implemented features like Analytics.
- Ensuring all features are done in time with the best quality possible.
- Bugfixing the errors that comes to the app giving priority to the most important ones.
- Reviewing, testing and giving feedback to pull-requests, making sure everything is working fine.

Software Developer

Buyviu

2020 - Feb 2022

As a team member in Buyviu I have:

- Implemented new features on the website reaching our planning objectives and fixed bugs.
- Consolidated the incorporation of our Chrome plugin which generated searches across different web pages.
- Introduced new API calls into the existing backend which was written in Python using flask and improved other existing calls to allow scalability.

Education

Postgraduate degree

ULPGC

Videogames development

(2017 –2018)

**Universidad de Las Palmas
de GranCanaria**

Computer Science (2011 –
2017)

Alvaro Falcon Morales

Software Developer

EXPERIENCE

Software Developer

Buyviu

2020 - Feb 2022

- Worked mostly on native app development using Ionic with React and Typescript. Also integrating new characteristics in the native code using Kotlin and Swift.
- Improved the quality of the code introducing CI/CD pipelines with Github actions.
- Increased code coverage by introducing unit and integration tests.

Android Developer

CIB Labs S.L

2019 - 2020

- In charge of continuously developing new features to our android application using Java and proactively proposing new ideas and improvements
- Cooperated with teammates across QA and marketing departments to surpass our project objectives.
- Migrated most of the code to Kotlin to update our project to the most recent technology.
- Worked in a team using agile methodologies such as Scrum.

Junior Software Developer

2Coders Studio S.L.

2017 - 2019

Worked on different projects as a junior software developer supervised by qualified and experienced teammates bringing the best output possible. Most of the projects were android native development

- Android native development using Java and Kotlin on different projects.
- React native applications
- Web application development using Vaadin Java framework.
- API development with Spring (Java)
